PhotoCapture Centre™

Combining three office functions – colour printing, copying and scanning – with the reliability and durability that you would expect from Brother, the DCP-130C is the ideal machine for your home or home office.

Easy to use, it delivers crisp, clear **prints** and photo's every time – whether you're printing professional black and white text documents or vibrant colour presentations with or without the borderless option.

The **scanning** software supplied gives you access to a range of scanning features including scan to e-mail, OCR, image, file (including PDF) and card. You can also translate a scanned

document or a webpage into a number of languages using the SYSTRAN® WebTranslator 5.0 software.

Producing quality **copies** has never been easier as the DCP-130C has a flatbed design that enables bound documents to be copied quickly.

The DCP-130C's **PhotoCapture Centre™** allows you to print directly from your memory cards or transfer files and images

to your PC, without the need for a plug-in card reader or specialist software. The media card is simply shown as an additional drive on your PC, allowing you to save and retrieve photos and documents with ease. Alternatively, you can print your photos directly from your digital camera using the PictBridge interface.

All Brother colour inkjet all-in-one products come complete with **individual colour**

**ink cartridges** so colours can be replaced separately. Brother original LC1000 ink cartridges with fade resistant ink used with Brother BP61 glossy photo paper enables the DCP-130C to print with a smaller droplet size (1.5 picolitre). The result is a higher quality photo with better definition.
